

# Introduction to version control with Git

Brain Leke Betetchouh & 'Wole Solana

April 7, 2015

**ThoughtWorks®**

# What is Git?

# What is Git?

- Git is a **version control** system (VCS) that allows you to keep track of changes made to a file, so you can recall specific versions of the file over time.

# What is Git?

- Git is a **version control** system (VCS) that allows you to keep track of changes made to a file, so you can recall specific versions of the file over time.
- Other version control systems include centralized VCSs such as Subversion and distributed VCSs like Mercurial.

# Setup

# Setup

## ■ Installing Git

```
1 apt-get install git
```

# Setup

## ■ Installing Git

```
1 apt-get install git
```

## ■ Configuring your settings

```
1 git config --global user.name "Your Name"  
git config --global user.email your@emailaddress.com
```

# Setup

## ■ Installing Git

```
1 apt-get install git
```

## ■ Configuring your settings

```
1 git config --global user.name "Your Name"  
git config --global user.email your@emailaddress.com
```

## ■ Initializing a local repo

```
git init
```

# Tracking changes I

## ■ Checking the status of your repo

```
1 git status  
  git diff
```

## ■ Undoing changes to files

### ■ Single file:

```
git checkout filename
```

### ■ Multiple files:

```
1 git checkout .
```

# Tracking changes II

## ■ Staging and Unstaging files

### ■ Single file:

```
1 git add filename
```

### ■ Multiple files:

```
1 git add .
```

# Tracking changes III

## ■ Committing your files

### ■ Single file:

```
1 git commit filename  
  git commit -m "Commit message"
```

### ■ Multiple files:

```
git commit .
```

- There is a command to *add* and *commit* in one line. That is left as an exercise for the students.

## ■ Ignoring files

- Create a file `.gitignore` and add the filenames (or file patterns) you wish to ignore

# Tracking changes IV

```
1 touch '.gitignore'
```

## ■ Amending a commit

```
1 git commit --amend
```

## ■ Commit History

```
1 git log
```

# Remote repositories

## ■ Initializing from a remote repo

```
1 git clone [remote_url]
```

# Remote repositories

- Initializing from a remote repo

```
1 git clone [remote_url]
```

- Setting up a repo on GitHub, BitBucket, etc.

# Remote repositories

- Initializing from a remote repo

```
1 git clone [remote_url]
```

- Setting up a repo on GitHub, BitBucket, etc.

- Adding a remote repo manually

```
1 git remote add [remote_name] [remote_url]
```

# Remote repositories

## ■ Initializing from a remote repo

```
1 git clone [remote_url]
```

## ■ Setting up a repo on GitHub, BitBucket, etc.

## ■ Adding a remote repo manually

```
1 git remote add [remote_name] [remote_url]
```

## ■ Pulling from a remote

```
1 git fetch [remote_name]  
git pull [remote_name]
```

# Remote repositories

## ■ Initializing from a remote repo

```
1 git clone [remote_url]
```

## ■ Setting up a repo on GitHub, BitBucket, etc.

## ■ Adding a remote repo manually

```
1 git remote add [remote_name] [remote_url]
```

## ■ Pulling from a remote

```
1 git fetch [remote_name]  
git pull [remote_name]
```

## ■ Pushing your work

```
git push [remote_name]
```

# Just getting started

# Just getting started

## ■ Branching

# Just getting started

- Branching
- Merging and merge conflicts

# Just getting started

- Branching
- Merging and merge conflicts
- Working with multiple remotes

# Questions and Exercises

# Questions and Exercises

- Register yourself at `bitbucket.com` (if you don't have an account set up)

# Questions and Exercises

- Register yourself at `bitbucket.com` (if you don't have an account set up)
- Email your user name to `wole@aims.ac.tz`

# Questions and Exercises

- Register yourself at `bitbucket.com` (if you don't have an account set up)
- Email your user name to `wole@aims.ac.tz`
- Using the commands introduced earlier, set up a git repo in a folder titled `TW_AIMS_Exercises`

# Questions and Exercises

- Register yourself at `bitbucket.com` (if you don't have an account set up)
- Email your user name to `wole@aims.ac.tz`
- Using the commands introduced earlier, set up a git repo in a folder titled `TW_AIMS_Exercises`
- Clone from this remote url:  
`https://bitbucket.org/wolesolana/aims-tz-student-exercises.git`

# Questions and Exercises

- Register yourself at `bitbucket.com` (if you don't have an account set up)
- Email your user name to `wole@aims.ac.tz`
- Using the commands introduced earlier, set up a git repo in a folder titled `TW_AIMS_Exercises`
- Clone from this remote url:  
`https://bitbucket.org/wolesolana/aims-tz-student-exercises.git`
- Modify the file named `Participants.txt` by adding your name and email address in the format of the previous entries

# Questions and Exercises

- Register yourself at `bitbucket.com` (if you don't have an account set up)
- Email your user name to `wole@aims.ac.tz`
- Using the commands introduced earlier, set up a git repo in a folder titled `TW_AIMS_Exercises`
- Clone from this remote url:  
`https://bitbucket.org/wolesolana/aims-tz-student-exercises.git`
- Modify the file named `Participants.txt` by adding your name and email address in the format of the previous entries
- Commit your changes with a good commit message

# Questions and Exercises

- Register yourself at `bitbucket.com` (if you don't have an account set up)
- Email your user name to `wole@aims.ac.tz`
- Using the commands introduced earlier, set up a git repo in a folder titled `TW_AIMS_Exercises`
- Clone from this remote url:  
`https://bitbucket.org/wolesolana/aims-tz-student-exercises.git`
- Modify the file named `Participants.txt` by adding your name and email address in the format of the previous entries
- Commit your changes with a good commit message
- Push your changes
